

FLUTTER

1.0

PERLENGKAPAN TEMPUR DI WINDOWS

➤ Windows :

- Windows 7 keatas 64-bit (mungkin ga perlu kalo pake hp sendiri yang android)
- HD 400 MB
- Windows Power Shell 5.0
- Git (pastikan bisa jalan di command / PowerShell)

PERLENGKAPAN TEMPUR DI LINUX

- OS 64-bit
- HD 600 MB (diluar IDE dan Emulator)
- Pernak-pernik lain yang perlu terpasang
 - `bash`
 - `curl`
 - `git`
 - `mkdir`
 - `rm`
 - `unzip`
 - `which`
 - `xz-utils`
 - `libglu1-mesa`

PERLENGKAPAN TEMPUR MAC

- OS 64-bit
- 700 MB (di luar IDE dan Emulator)
- Pernak pernik lain yang terpasang :
 - `bash`
 - `curl`
 - `git`
 - `mkdir`
 - `rm`
 - `unzip`
 - `which`

IDE

- Android Studio ? Versi 3
- IntelliJ IDEA Community / Ultimate -> versi 2017.1
- Visual Studio Code

Pasang *Plugins*-nya :

- Flutter
- Dart

INSTALASI

Unduh berkas Flutter di tautan berikut :

<https://flutter.io/docs/get-started/install>

➤ Windows :

- Jangan taruh itu di Program Files
- jalankan `flutter_console.bat`

➤ Linux :

- Ekstrak dan taruh di PATH.

➤ Mac :

- Ekstrak dan taruh di PATH.

ENOUGH BLABLA!!

JUST SHOW ME THE CODE!!

HALO DUNIA

```
1. import 'package:flutter/material.dart';

3. void main() {
4.   runApp(new MaterialApp(
5.     home: new MyApp(),
6.   ));
7. }

9. class MyApp extends StatefulWidget {
10.   @override
11.   _State createState() => new _State();
12. }

14. class _State extends State<MyApp> {
15.   @override
16.   Widget build(BuildContext context) {
17.     return new Scaffold(
18.       appBar: new AppBar(
19.         title: new Text('Name here'),
20.       ),
21.       body: new Container(
22.         padding: new EdgeInsets.all(32.0),
23.         child: new Center(
24.           child: new Column(
25.             children: <Widget>[
26.               new Text('Add Widgets Here')
27.             ],
28.           ),
29.         ),
30.       ),
31.     );
32.   }
33. }
34.
```
